

In December 1999, CCCUC began their phased implementation of Counter Solutions networked EPOS, Stock management and Cashless Catering system.

Firstly, the main refectory and staff feeding facility were installed with IBM 4695 Touchscreen EPOS terminals. Residential students were issued with Catered Student Cards to manage their daily food subsidy via the CardWise Management System. This was closely followed by the installation into the student buttry and coffee shop.

The recent addition of Counter Solutions networked Customer Service point, has assisted the staff and students to manage their own funds on the cash purse effectively. Previously this was managed centrally by the Catering Department.

Utilising the full suite of Counter Solutions back office and EPOS Products, CCCUC have the ability to manage their OutletWise, StockWise and CardWise from one central NT server, secured with SQL Server database.

Key Features at CCUC:

- ✓ Networked TouchScreen EPOS Terminals
- ✓ Staff and Student SMART Card Facility
- ✓ Networked Customer Service Point
- ✓ Cafeteria, Coffee Shop and Bar Operation
- ✓ OutletWise EPOS Management System
- ✓ CardWise Card Management System
- ✓ StockWise Stock Management System
- ✓ 365 Days per year System Support and Diagnostics
